

PATHS to KINDERGARTEN

This is a traditional option that many families choose for their children.

4 School Kindergarten

This option allows children to learn how to participate in a school setting before beginning the Kindergarten readiness structure of 4 School. Our teachers have found that children who complete 3 School are very prepared to enter 4 School.

3 School 4 School Kindergarten

This option is for children who have a spring/summer birthday in 4 School and would benefit from an extra year in Young 5s to grow academically, socially, or emotionally before entering Kindergarten.

4 School Young 5s Kindergarten

This unique option is not a traditional path. Some children with fall birthdays in 3 School could go to Young 5s. This option must be approved by the teacher and the Early Childhood Director.

3 School Young 5s Kindergarten

This option may be good for children with a summer birthday who enter 3 School very young. These children may still need an additional year after 4 school to grow academically, socially or emotionally before Kindergarten.

3 School 4 School Young 5s Kindergarten

This option is for children who have had a good educational experience outside of a school setting and are ready for a highly academic Kindergarten readiness program.

Young 5s Kindergarten

This option is for children who have had a good educational experience outside of a school setting and are ready to start the academic demands of 3, 4 or 5 full days.

Kindergarten

* 4 School refers to traditional or nature-based.
